## OBJECTIVES

- EVITA aims to establish the EuroHPC Virtual Training Academy and the Competence and Qualification Framework (CQF), creating a long-term foundation for high-quality HPC education across Europe. It connects learners, trainers, and institutions through a shared framework that ensures quality, certification, and collaboration, fostering a sustainable and cohesive European HPC training ecosystem.

## GENERAL INFORMATION

- Started in April, 2025, runs until 2029
- 8 institutes from 7 countries
- 3 open calls for training providers through cascade funding to develop modules
- Deliver innovative training modules and an online platform offering structured learning pathways and certification of skills

## MISSION

- Building learning framework**

Providing tools such as the HPC Certification Forum Skill Tree to create structured learning pathways, guiding learners step by step towards skill certifications and professional profiles.

- Developing training modules**

Public calls to support developing new short, modular training units that can be reused and adapted across Europe.

May 2026 —————● 1st call  
Nov 2026 —————● 2nd call  
May 2027 —————● 3rd call

Visit our module template!

- Supporting certification**

Developing a European-wide certification scheme so training, certificates, and badges are recognised across borders.

## Competence and Qualification Framework

- CQF serves as both a framework and a stamp of quality, linking skills, modules, and courses and learning pathways to create a unified standard for HPC education across and beyond EVITA.

**Skill** - Each circle represents one skill

**Modules** - Each module includes at least one skill

**Courses** - Each course consists of at least one module

**Learning pathways** - A learning pathway consists of a combination of multiple courses and modules. Upon completion, a certificate may be awarded.
